# Reviewer walkthrough

Public application / private reviewer passwords

| | |
|---|---|
| **1. Intake** | Business client: open Dossier Inbox and select the prepared synthetic batch. |
| **2. INGESTIONLAB** | Open the preparation view, then continue to Cervello. |
| **3. Shared brain** | Select the contract wiki node and open a cited original passage. |
| **4. Advisor** | Ask about Cloud A and Newsletter B monthly contract amounts and missing conditions. |
| **5. Accountant** | Use the accountant profile to open the same client archive and inspect the sourced note. |
| **6. Report** | Export a dossier or Advisor draft PDF and inspect sources and review status. |

# Demo scope and access

Fabricated data / shared demonstration profiles

Choose PMI for Aurora Demo SRL, Privato for Giulia Demo, or Console Studio for the accountant. Passwords must reach reviewers through a private channel, separate from public materials.

Each client archive has 11 invented originals. The accountant profile can access both authorized archives. Reviewers using the same profile share its state.

AMD runs on the server. The hosted allowance is 1,000 cumulative dispatches, including failed or uncertain dispatches. The API key stays in private server settings.

AI outputs remain proposals. Retrieval is partial and lexical. Draft reports do not certify payments, tax treatment, completeness or professional correctness.
